LEADERS IN COMMERCIAL SOLAR

What to expect when dealing with the team at KUGA?

We have a strong proven track record over the past 5 years. Our team has successfully completed over 5,000 projects Australia wide. Kuga's purpose is to generate savings for businesses at a really healthy return on investment. Our key services are Solar Power, Solar Battery Storage, LED Lighting Upgrades, Power Factor Correction, Electrical Services and Diesel Generator installations.

When dealing with our team at Kuga, you can expect highly trained individuals who are values-driven and understand our products and services to a really high level. As our company is a business to business organisation, our reputation is important to us. Many of our team have been here since we started way back in 2016. We aim to impress our customers as it is our key to gain more prospective customers.

Our industry is very competitive, so we remain best in the market by buying large volumes from quality manufacturers and by delivering projects on time and to budget with our own internal Kuga Electricians. We then pass on all the benefits to our customers by providing a really competitive price. Our purpose is to save businesses money.

5 REASONS WHY BUSINESSES CHOOSE KUGA

1

Specialising in Commercial Solar since 2016 and delivered over 500 commercial solar installations across Australia.

2

Large buying power with leading manufacturer that translates to competitive prices for your business.

3

Experienced in delivering solar installation roll outs to budget and timelines.

4

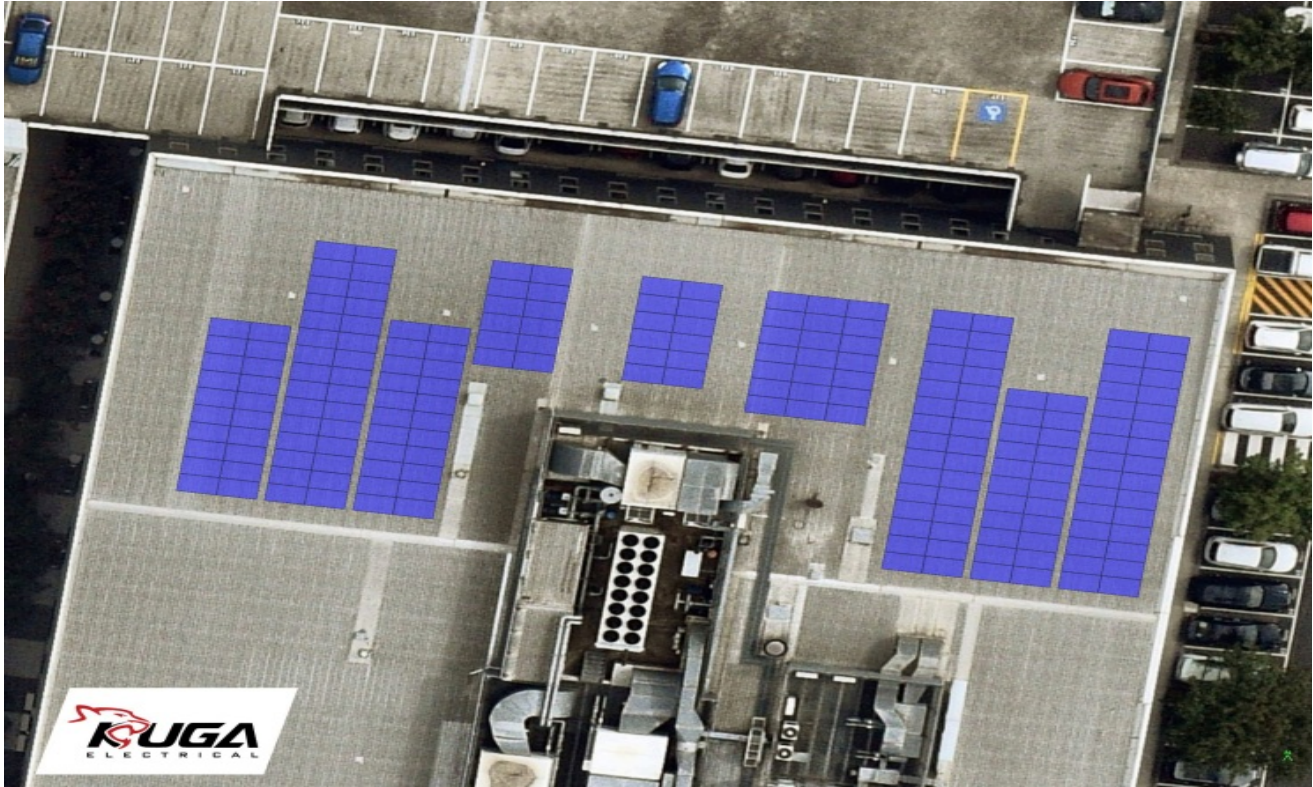

In-house Engineering and Installation teams to deliver consistent quality installations.

5

Our Maintenance Team ensures your system hits the performance guarantee.

SITE PLAN

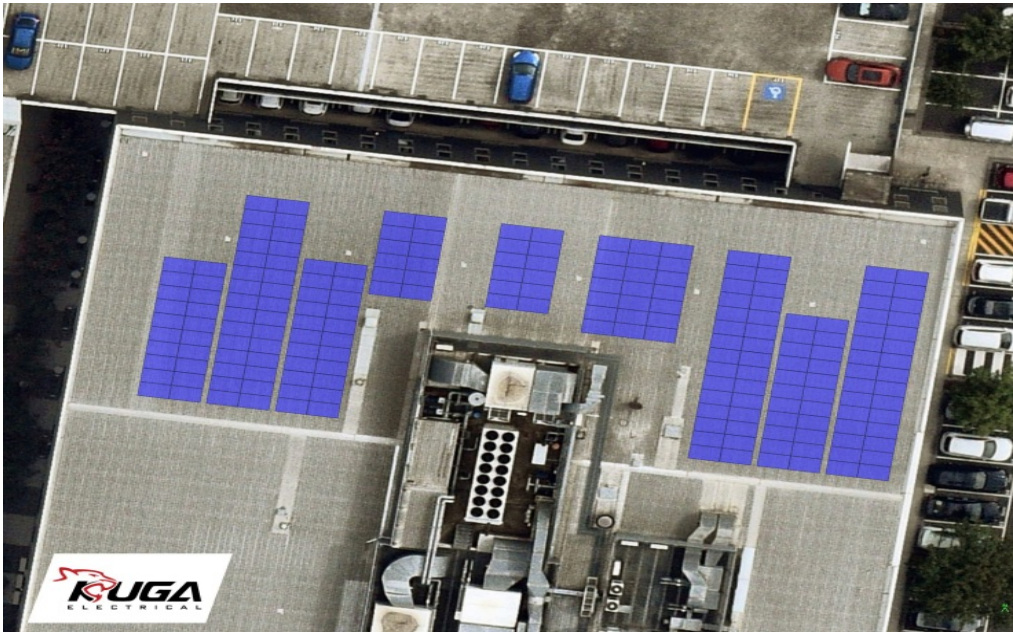

Urban Acres

321 Ferntree Gully Rd, Mount Waverley VIC 3149

Manufacturer power rating for array	99.50 kw
Number of Panels	199
Panel Orientation	8.5°
Panel Tilt	3°
Panel Type/Model	Trina 500W N-Type NEG18R.28
Inverter Type/Model	Sungrow 110Kw 3P (SG110CX)

YOUR SOLAR PANEL LAYOUT

- Subject to Structural Assessment.
- Panels have been designed with a north facing orientation to maximise solar generation.
- Panels come with a full 25 year warranty.
- Rails to be fixed to the roof using the existing screw lines.
- Rails come with a 20 year warranty and will be certified by an independent structural engineer prior to installation.
- Panels to be loaded on to roof using a crane. A site specific panel loading report will be supplied by an independent engineer. This will ensure pallets of materials are loaded on the most structurally suitable locations on the roof.
- Additional walkways can be supplied if required.

YOUR SOLAR INVERTER LAYOUT

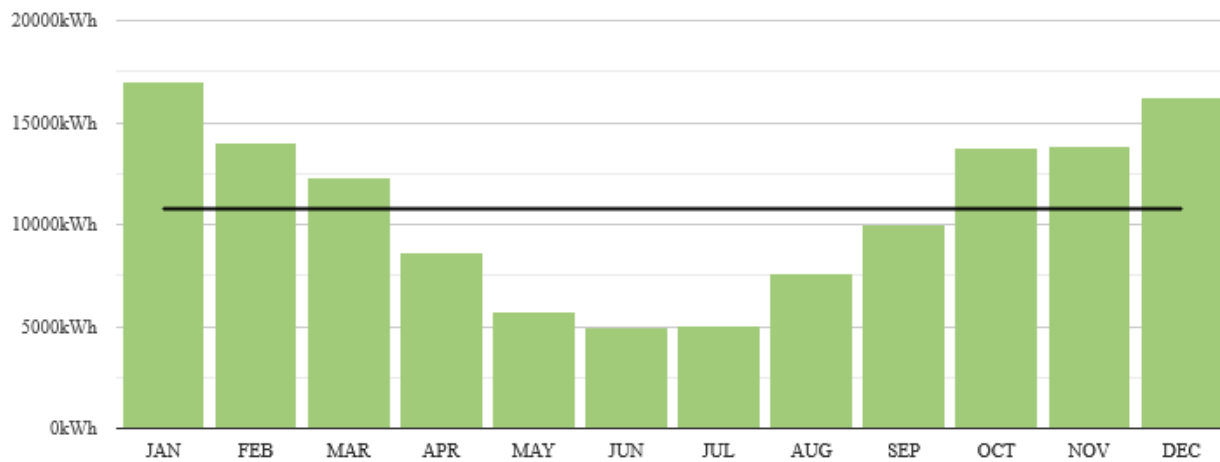

- Assume to build a Unistrut Structure as close as possible to the connection point with a simple cover to mount the Inverter and Network Protection Unit
- This design utilizes 1x 110kW Sungrow inverter. This will be connected to NMI: 6407737679-01 which is associated with the base building.
- This inverter will be connected to the Mechanical Services board which is located on Level 2. The existing frame on the roof will be used to mount the inverter and Network Protection Board.
- Cable will be run from the Mechanical Switchboard on Level 2 through the existing cavity to the roof.
- An external breaker will be installed beside the Mechanical Service Board.
- A steel frame with canopy will be installed for added protection from the elements.

RECENT INSTALLS

EXTRUSIONS AUSTRALIA

The solar solution at Extrusions Australia comprised two separate installs. This allowed KUGA to display their expertise in both the Large and Small-Scale Generator space. The Federal rebate schemes are set up quite differently under each category.

KUGA used the largest inverters on the market (Sungrow 110kW) in order to minimise the complexity and installation time. For the PV panels, the German-Engineered Q Cells were selected for their high yield and exceptional build quality.

Annual Solar Generation
473.53 MWh

CO₂ Savings
466.6 Tons

ST FRANCIS OF ASSISI

Catholic Education Melbourne oversees 290 primary schools in the Melbourne region. As part of an energy efficiency initiative rolling out across their education network, they decided to install out across their education network, they decided to install a 99.9kW roof mounted solar system in Melbourne's outer West. Being a large organisation, CEM has strict requirements around product and suppliers. They decided on 450W Half Cell EGing panels, due to their warranty, performance, and compatibility.

Annual Solar Generation
83.93 MWh

CO₂ Savings
85.14 Tons

RECENT INSTALLS

BALLANTYNE

Ballantyne KL is a large producer of dairy product based in Melbourne. KUGA Electrical was selected as the successful EPC partner for a 1.2MW solar installation in May 2022. In addition to reputation and quality, the key selection factor was turnaround time. Ballantyne needed a supplier with the capability to install by the end of financial year. The turnaround from the initial site inspection through to practical completion was 10 weeks.

Annual Solar Generation
1408 MWh

CO₂ Savings
1500.14 Tons

ESR AUSTRALIA PTY LTD.

ESR is APAC's largest real asset manager and 3rd largest listed real estate Investment Manager globally.

ESR aspires to operate sustainably and is built by Hansen Yunken through the tender process. KUGA won this project by completing Solar PV for Lot 201 and 202 for 4 tenancies for 330kW.

As per ESR's design brief, KUGA installed Solar PV with 25 Year Warranty Sunpower panels.

Annual Solar Generation
494.74 MWh

CO₂ Savings
492.76 Tons

KUGA ELECTRICAL LEADERS IN COMMERCIAL SOLAR INSTALLATION

“

Our experienced team of electricians have 5 years of Commercial Solar Installation Experience. We have delivered over 500 Commercial Solar projects across Australia. Get your solar installation done right the first time. GO KUGA ELECTRICAL!

To whom it may concern

Master Electricians Australia (MEA) is pleased to confirm that KUGA AUSTRALIA PTY. LTD. trading as Kuga Electrical is a member and has been since 05/03/2018.

All members of MEA have access to our dedicated Technical Support Hotline and our ME Safety Express system to assist them in their business. This provides direct telephone support to MEA Members as well as an online safety portal known as ME Safety Express.

Specifically, the ME Safety Express portal allows for MEA Members to access –

- an abridged version of the MEA Business Manual;
- the Field Safety Manual;
- an abridged set of Safe Work Method Statements;
- Safety Data Sheets; as well as
- other programs and services such as a number of key toolbox video tutorials, access to MEA delivered fee-for-service safety meetings, audits, training, and customised support services, and access to a version of the Mobile field app - incident reporting and Mobile field app - risk assessment.

If you would like further information about MEA, visit www.masterelectricians.com.au or call us on 1300 889 198.

Kind regards
